

INMACOM Team Credentials

Provisioned via `php artisan user:seed-team` on 28 May 2026.

Sign-in URL: `/login` (Firebase email/password). No registration PIN required — accounts are pre-provisioned.

Mozambique users have their preference language set to **Portuguese (pt)** and will see the UI in Portuguese on first login. All others default to **English (en)**.

Name	Email	Password	Role	Country	Language

Notes

- Passwords are stored hashed in both Firebase Auth and the local `users` table — they cannot be retrieved later. Save this file securely.
- To rotate any of these passwords, run: `php artisan user:seed-team --reset-passwords`.
- Users can change their UI language at any time via the language switcher in the app.
- Emails are case-insensitive (Firebase Auth normalises them to lowercase).
